DERRICK CHAN

Derrick Chan is majoring in Computer Science and Engineering while also pursuing a minor in technical innovation, design thinking, and the entrepreneurial mindset. Derrick has worked extensively with Synopsys over the past two years with different roles such as frontend/backend developer, database manager, and data analytics. Derrick has worked extensively with embedded systems and their associated costs.

JUSTYN LI

Justyn Li is majoring in Mechanical Engineering and double minoring in Entrepreneurship and Sustainability. She has been working in the aerospace defense industry for the past three years performing a wide range of duties from writing product quality deficiency reports, writing technical training packages and business proposals, and giving technical presentations. Justyn particularly enjoys projects that allow her to hone her technical skills and business savvy and apply them to real (or simulated) scenarios.

TAYLOR MAU

Taylor Mau is a double major in Computer Science and Engineering and Electrical Engineering. She is currently the president of the Maker Club and is able to open the Maker Lab when needed. Taylor has also had two internships in the past including one at Apple Inc. She loves working on projects and has worked on the Tiny House Team where she helped build a 238 sq. ft. house that rotates to track the sun as well as worked on the Micromouse Team where she helped build a robot that autonomously solves a maze.
